INTERIOR DOORS

Interior Doors Built to Your Specification

Send a photo, drawing or sample of the door you want, and we make it to your sizes and finish. The designs in this guide are examples of what our factory makes: flush, panel, glass, pivot, hidden, pocket, barn and folding doors, in natural wood veneer, laminate or paint.

Charcoal interior door with horizontal metal inlays in a sunlit hallway. Images show the look, not a specific project.

Made in our factory
Made to order in our factory in China. Our natural wood veneer doors use its China-patented panel-bending technology, with no separate edge strip.

Every design here is an example
Send a photo of the door you want, and we make it in your sizes, finish and configuration, including as a hidden, pivot, pocket, barn or folding door.

One U.S. team
Drawings, quality, shipping and import, handled by our team in California, from your first email to delivery.

01 · TYPES AND CONFIGURATIONS

Every Interior Door on One Order

Flush, pivot and specialty doors can go on one order with one U.S. company, instead of splitting the openings on your plans between suppliers. Each door is prepared for the hinge, pivot or track system it runs on.

Flush doors
Flat-faced doors in natural wood veneer, laminate or paint, over a solid core (particleboard or solid wood) or a hollow core.

Panel, groove and inlay doors
Shaker-style panels, grooves and inlaid lines, from pages 5 and 6, or to your drawing.

Glass doors
Framed glass lites, from grids to arched tops (page 7). Your quote confirms the glass for each door.

Pivot doors
Doors that turn on top and bottom pivots instead of side hinges, for wide or tall openings. Size, pivot hardware and finish are confirmed in your quote.

Hidden flush-to-wall
Doors that sit flush with the surrounding wall on concealed hinges. Your choice: the door alone, or the door with its concealed frame.

Pocket, barn and folding
Pocket doors slide into the wall, barn doors run on an exposed track, and folding doors fold back in panels. Pocket doors: the door alone, the door with track and hardware, or a complete pocket frame kit, per quote.

Tall, oversized and thick
Doors taller, wider or thicker than standard, made to the sizes on your drawings. Your quote confirms the construction for each opening.

Pairs
Two doors in one opening, for wide openings and closets. Tell us the opening and the look you want.

Fire-rated openings
Yes, by project. For openings that need a rating, we source labeled doors from partner factories that already supply the U.S. market. Tell us which openings need a rating and what your project requires.

Slab, Frame, Complete Package or Pre-Hung

Your configuration is set in your quote and in the final specification you sign

	Door slab DOOR ONLY	Door with frame KNOCKDOWN	Complete package KNOCKDOWN	Pre-hung, one box OPTION, EXTRA COST
Door, finished to your specification	**Included**	**Included**	**Included**	**Included**
Frame (jamb)	Not included	**Included**	**Included**	**Included**
Casing	Not included	Not included	**Included**	**Included**
Factory machining (mortising and boring) for the hinges, lock and handle you specify	**Option**	**Option**	**Included**	**Included**
Hinges supplied	**Option**	**Option**	**Option**	**Included**
Lock and handle supplied	**Option**	**Option**	**Option**	**Included**
Door hung in its frame	No frame	On site	On site	**At our factory**
Installation	Your installer	Your installer	Your installer	Your installer

Knockdown is our standard. Pre-hung is an option at extra cost: the door hung in its frame at our factory, the full door in one box per opening. On knockdown orders, the frame and any casing ship flat; your installer assembles the frame, hangs the door and fits the lock and handle. We supply; your installer installs.

Sizes

U.S. standard sizes; your drawings set the final sizes

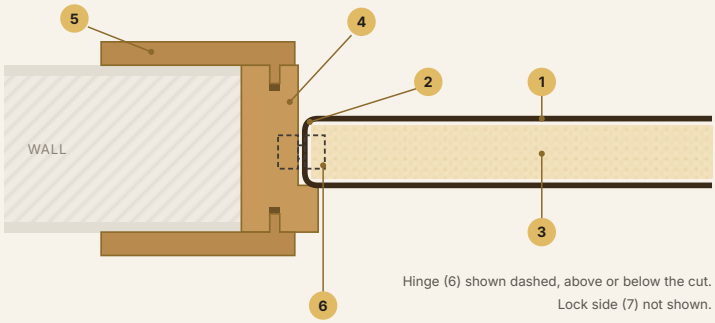

Heights	80, 84 and 96 in.
Widths	24, 28, 30, 32 and 36 in.
Thickness	1 3/8 in. standard; 1 3/4 in. for doors over 36 in. wide or 90 in. tall, or to your specification
Other sizes	Taller, wider or thicker, made to the sizes on your drawings

02 · INSIDE THE DOOR

How the Door, Frame and Casing Fit Together

One opening, seen from above at the hinge side. The configuration you choose sets which parts we supply, and your quote confirms each one.

PLAN VIEW AT THE HINGE SIDE · SIMPLIFIED, NOT TO SCALE

Hinge (6) shown dashed, above or below the cut.
Lock side (7) not shown.

1. **Finished face:** natural wood veneer, laminate or paint, finished to your specification.
2. **Wrapped edge:** on natural wood veneer doors, the face panel is bent around the edge with our factory's China-patented panel-bending technology. There's no separate edge strip to lift or chip.
3. **Core:** solid core (particleboard or solid wood) or hollow core, your choice.
4. **Frame and jamb:** plywood, with the jamb made to your wall thickness: 4 9/16, 5 1/2 or 6 9/16 in., or to your specification.
5. **Telescoping L-casings:** slide in a groove in the jamb to fit the finished wall, a China-patented adjustable casing.
6. **Hinges:** concealed adjustable hinges, or the hinges you specify.
7. **Lock:** a magnetic-latch mortise lock, or the lock you specify. The door is factory-machined (mortised and bored) for it.

What We Confirm Before Production

Your openings, in inches
Door sizes, handing (left or right, in-swing or out-swing) and wall thickness for each opening.

Construction and hardware
Core, configuration, and the hinges, lock and handle each door is machined for.

Finish and packing
Face, color and finish for each door, and knockdown or pre-hung packing.

Sizes, construction, finish, hardware preparation and packing go into the final specification you sign. We do our best to double-check your drawings, but final dimensions are yours to confirm. Concealed hinges, magnetic-latch locks and similar hardware are custom options you choose.

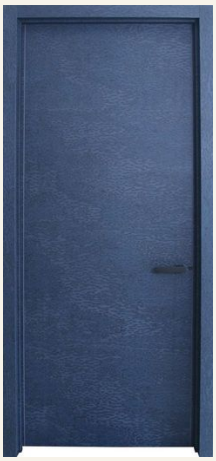

03 · NATURAL WOOD VENEER SERIES

Natural Wood Veneer Doors

Twelve flush designs in natural wood veneer, from quiet wenge to herringbone and burl figures. Each can be made in your sizes, from a slab to a pre-hung set, and as a hidden, pivot, pocket, barn or folding door. Natural veneer varies in color and grain from door to door. Examples, not the limit: send your own reference.

IV-01
Seoul
Multicolor herringbone

IV-02
Busan

Oak Pair, Twin Lines
Pair

Walnut veneer double pocket doors, partly open between a living room and a dining room.

Pairs and wide openings
Two doors in one opening, for wide openings and closets. Tell us the opening width and the look you want.

Your design, our factory
Send a drawing or a photo of the door you want. We sign an NDA on request, and the designs you bring stay exclusive to your brand.

Images show each design, not a specific project. Colors in print and on screen vary from the actual door.

06 · GLASS DOORS AND FINISHES

Glass Doors and Finish Choices

Framed glass lites for kitchens, studies and closets, from grids to arched tops. The glass, its pattern or tint, and the frame finish are confirmed for each door in your quote. Examples, not the limit: send your own reference.

IG-01
Espresso, Grid Glass

IG-02
Espresso, Textured Glass

IG-03
Espresso, Oval Lite

IG-04
Taupe, Oval Textured Lite

IG-05
Taupe, Oval Amber Lite

IG-06
Espresso, Arched Grid

IG-07
Espresso, Arched Lite and Panel

IG-08
Espresso, Arched Amber and Panel

IG-09
Champagne, Arched Textured Lite

IG-10
Taupe, Arched Amber Lite

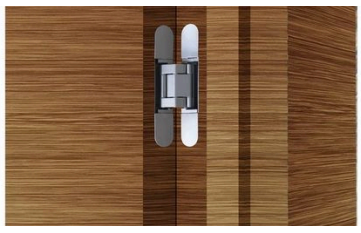

Any Face, Over the Core You Choose

Any combination you need

Natural wood veneer
Name the veneer species you want, or send a sketch, a photo or a reference, and we work out how our factory can make it in real wood veneer.

Laminate
Send the color or pattern you need, and your quote confirms it before production.

Paint
Painted finishes in the color you specify, or another finish you need.

Natural veneer, close up (IV-04 Suwon)

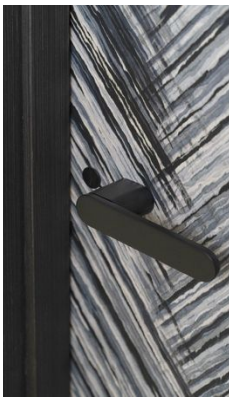

Core and samples
Over a solid core (particleboard or solid wood) or a hollow core. Finish samples, including veneer jamb and casing samples, are available on request; you cover the shipping. Our IBS 2026 display doors are at our warehouse in La Mirada, California: schedule a visit, or ask for a video call.

07 · HARDWARE, FRAMES AND MATCHING WALLS

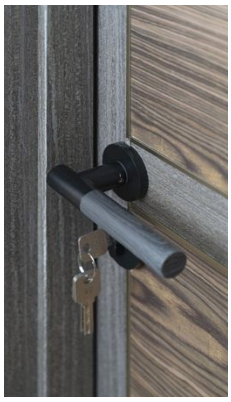

Hardware, Frames and Matching Walls

Doors are made in U.S. standard sizes and machined for hinges, handles and locks readily available in the U.S. On custom orders, hardware is your choice: the hinges, lock and handle you specify, or pre-boring for hardware you source yourself. Shown here are examples; your quote confirms the hardware for each door.

Concealed adjustable hinges

Lever on a veneer door

Lever with key cylinder

Round-rose lever

Square-rose lever

Plate lever with key

Frames and Casing

Frame and jamb	Plywood
Jamb widths	4 9/16 in. (2×4 wall with 1/2 in. drywall), 5 1/2 in. (stucco or thick drywall), 6 9/16 in. (2×6 wall or block), or made to your wall thickness
Casing	Telescoping L-casings that adjust to the wall
Handing	Left or right hand, in-swing or out-swing, set for each opening

Doors That Match the Wall

Wall panels from our factory

Hidden flush-to-wall door, closed, in a warm plaster wall. Images show the look, not a specific project.

Matching wall panels
Natural wood veneer wall panels can match your veneer doors, and hidden doors can be finished to match the panel wall around them. See our Wall Panel Selection Guide at baraven.com/wall-panels.

Furniture and casework
Furniture can be quoted with your doors on the same order, by project. See baraven.com/furniture.

08 · HOW TO ORDER

From Your Door Schedule to Delivery

Send what you have. We reply by email within 1–2 business days.

1
Send your openings
Door schedule or drawings, sizes, handing, wall thickness and quantities.

2
Choose the look
A code from this guide, your own photo or a sketch, plus the core and configuration.

3
We confirm the details
Sizes, construction, finish and hardware preparation, in your final specification.

4
Approve before production
Production starts once your final specification is signed and your 50% deposit has cleared.

5
Made and checked
Made in our factory and checked before shipping, with photos before shipment.

6
Delivery
Custom door orders typically take 12–14 weeks from the start of production to delivery at your site.

Delivery and Terms

Delivery basis	FOB at the factory port in China, CIF to a U.S. port, or delivered to your job site in the continental U.S. Your quote states the basis and what it includes.
Phased delivery	Large projects can be delivered in phases, by building or floor. The phases and their dates are set in your quote.
Payment	For custom door orders, a 50% deposit starts production; the balance is due before release.
Minimums	Confirmed in your quote
Warranty	Limited 2-year warranty: see our Terms at baraven.com/terms.

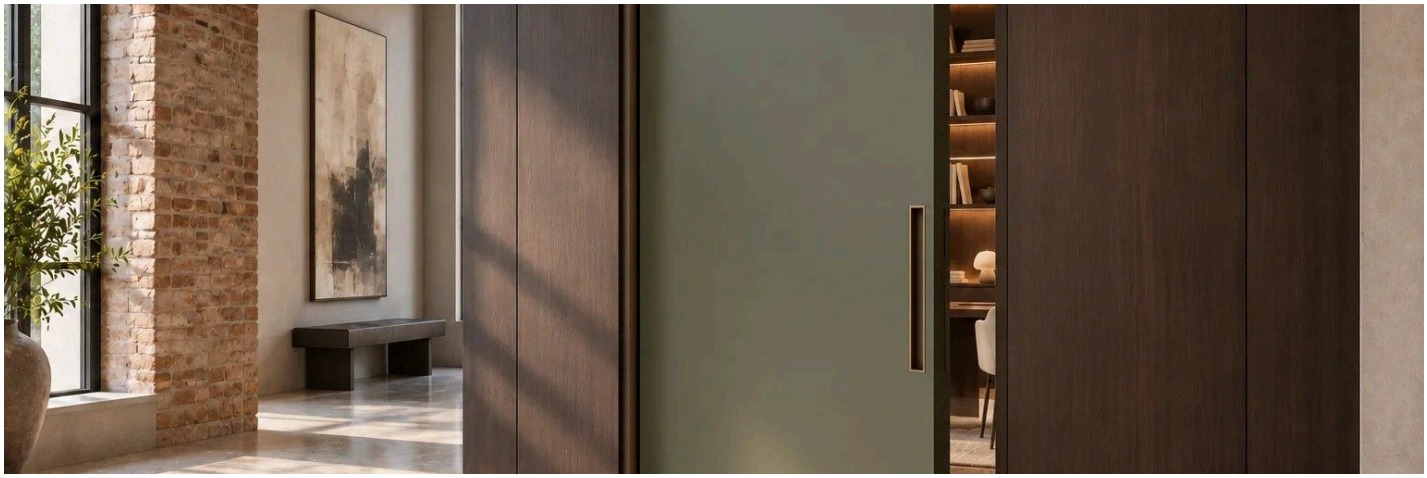

Why Order Through BARAVEN

One U.S. team
Our U.S. team runs your order with our factory, from the first email to delivery.

No middleman
Made to your specification in our factory, with no trading company in between.

Damage handled here
Report all damage, including damage found after unpacking, with photos within 48 hours of delivery.

Need doors sooner?
In-stock pre-hung sets ship from California with no minimum order: baraven.com/daegu.

Sage green painted pivot door, open, between an entry hall and a study. Images show the look, not a specific project.

Send us your door schedule. Openings and sizes, handing, wall thickness, quantities, a code from this guide or a photo of the look you want, core and configuration, the hardware you plan to use, the delivery location and your needed-by date.
info@baraven.com · baraven.com/custom-interior-doors · We reply by email within 1–2 business days.

BARAVEN codes are used in this guide. Images show each design; finishes, glass and hardware in the images are examples. Colors in print and on screen vary from the actual door, and natural veneer varies in color and grain from door to door. Sizes, materials, finishes and what's included are confirmed in your quote. Requirements vary by project: tell us what your project requires, and we confirm it in your quote. We sign an NDA on request, and the designs you bring stay exclusive to your brand. We supply; your installer installs.
