

LARGE-FORMAT WALL PANELS

Wall Panels Made to Your Walls

Stone, wood, fabric and metal looks in large boards, plus marble patterns sold as matched vein sets. One U.S. team handles your order, from the first drawing to delivery, so you don't have to.

**About 151 finishes**

Nine families: wood, fabric, woven, soft-touch, stone, metal, mirror-finish, gloss and ripple.

22 matched vein sets

Marble looks whose veins run on from board to board across the wall.

One U.S. team

Quality, timing, shipping and import, handled by our team in California.

How to order

01 · THE BOARD

How the Board Is Built

Four layers, with the same hard layer on both sides of the core.

1 · Decorative face

The look you choose: PP, PVC or PET film, metal film or a water-based fabric film.

2 · Hard surface layer

An acrylic-based layer over the face side of the core.

3 · Core

PVC resin, bamboo-charcoal fiber and calcium carbonate.

4 · Hard back layer

The same acrylic-based layer on the back, so both sides of the core match.

Sizes and surfaces

Board width	About 4 ft (1200–1220 mm, by series)
Vein-set heights	2440, 2600, 2800 or 3000 mm (8 ft to about 9 ft 10 in), or made to your wall height
Other boards	Height and thickness confirmed in your quote
Surfaces	High gloss, matte or soft-touch, by finish

Edges and machining

- Edge profiles by wall: double female groove, tongue-and-groove (flat or locking) or U-groove
- Cut to size, and grooved or engraved for patterns

Range by family

FAMILY	FINISHES	SURFACE
Wood looks	24	Matte grain
Fabric and linen looks	20	Matte, textured
Woven textures	17	Matte, textured
Soft-touch solids and leather grains	20	Soft-touch matte
Stone and marble looks	32	Matte or high gloss
Metal looks	15	Brushed or matte
Mirror-finish and iridescent	10	Mirror shine
High-gloss solids and sparkle	10	High gloss
Water ripple	3	Rippled metallic
Total	151	

Counts from the current range. This guide shows a selection of each family; ask us for any color or pattern not shown.

How the panels go up

1

Flat wall first

Level an uneven wall first with plywood, gypsum board or cement board.

2

Plan the boards

Measure each wall; use full boards on wide walls and cut evenly on narrow ones, around doors and windows.

3

Top and bottom trims

Fit the trims first, so each board slides into place.

4

Adhesive and joint strips

Structural adhesive on the back; a slim metal strip in each joint holds the next board in line.

5

Corner and end trims

Inside, outside and end trims finish the edges. Count them per wall before installation.

6

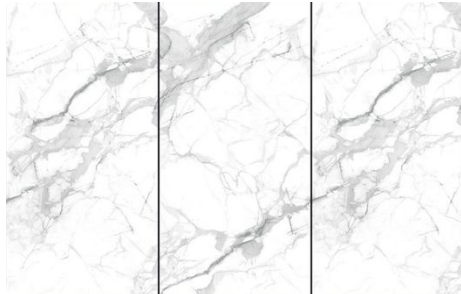

Supply only

We supply the panels; your installer installs. Tell us if you want trims and adhesive included, and your quote confirms it.

02 · MATCHED VEIN SETS

Marble Looks That Run Across the Wall

Each set is two, three or four boards (A, B, C, D) whose veins join edge to edge. On a long wall the set repeats, and the vein still lines up at the joint. Gloss or soft matte.

03 · FINISHES BY FAMILY

Board Finishes

A selection from each family. Colors in print and on screen are approximate; your quote confirms the finish before production.

Wood looks

Oak, walnut, maple and pear looks on a printed face. Not real veneer.

Fabric and linen looks

Linen, silk and woven looks for headboard walls and quiet rooms.

03 · FINISHES BY FAMILY, CONTINUED

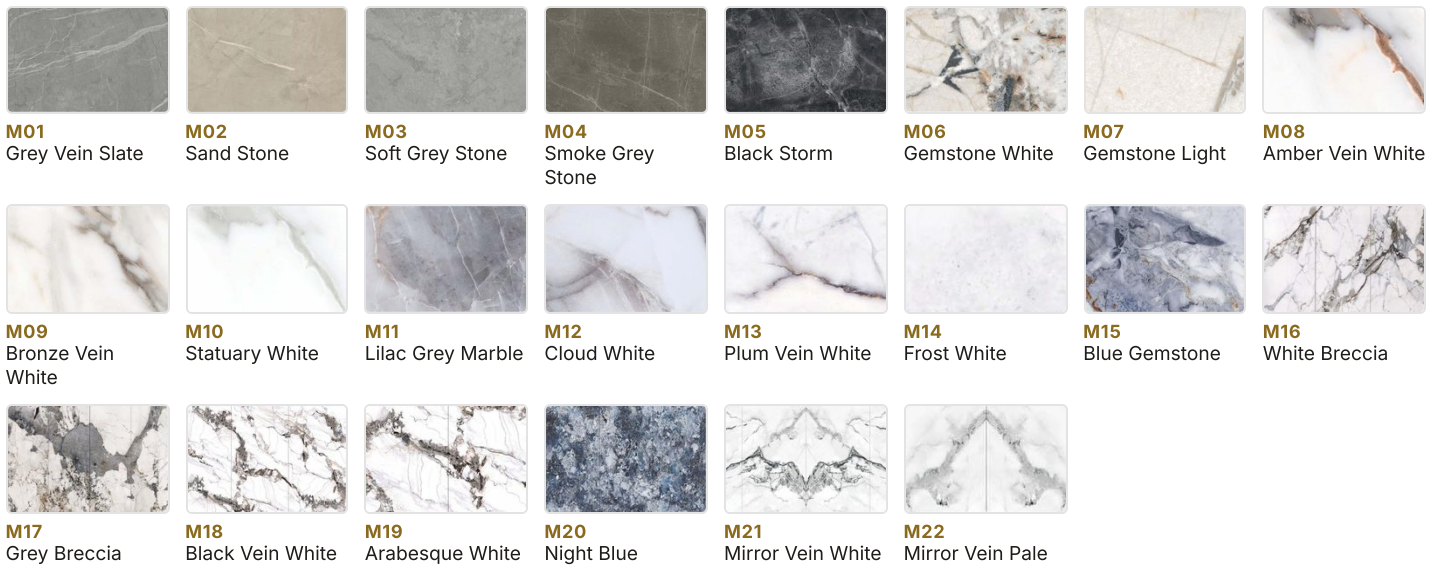

Soft-touch solids and leather grains

Matte, soft-touch colors and leather-grain faces.

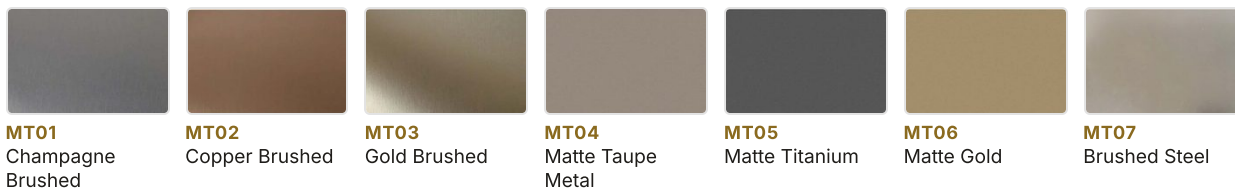

Stone and marble looks

Matte slate looks and high-gloss marble looks. For veins that run across the wall, see the vein sets.

Metal looks

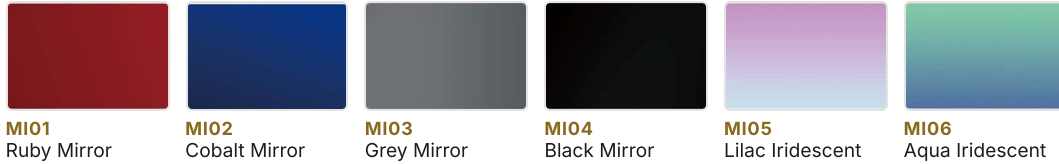

Brushed and matte metal looks on a film face.

03 · FINISHES BY FAMILY, CONTINUED

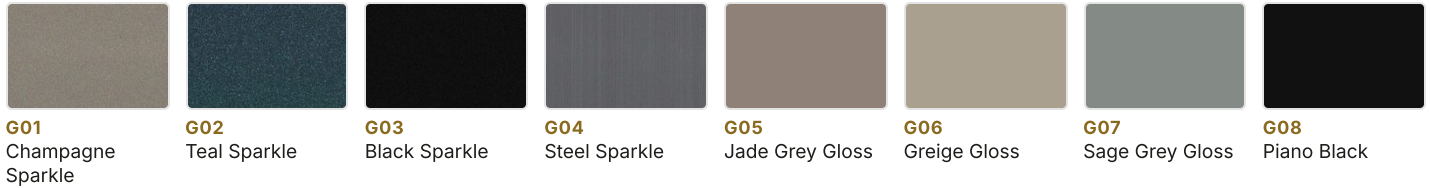

Mirror-finish and iridescent

High-shine mirror-finish film in color, and iridescent finishes.

High-gloss solids and sparkle

Gloss colors, some with a fine sparkle.

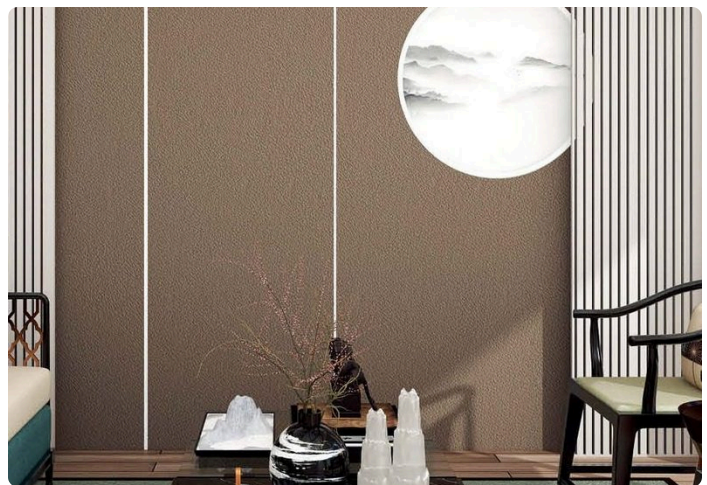

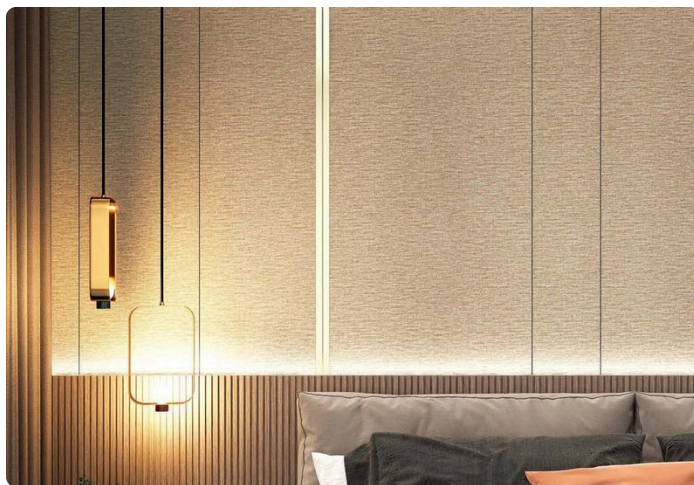

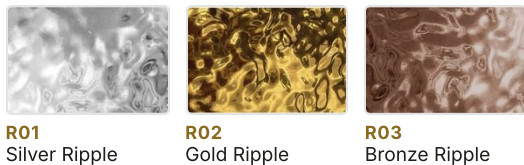

Woven textures

Fabric-film and woven textures with a soft, matte face.

Water ripple

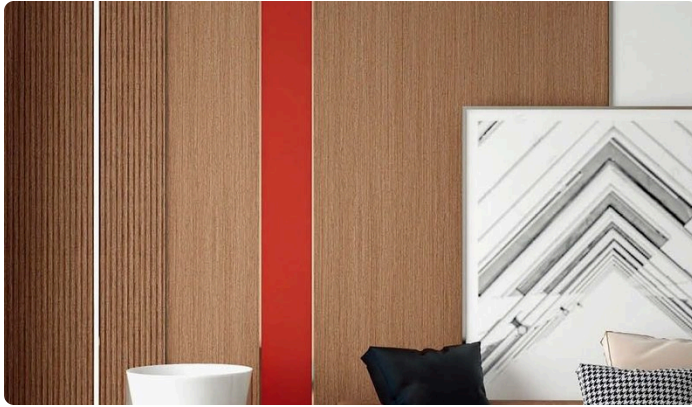

Rippled metallic faces for feature walls, ceilings and bars.

Fabric-look and solid-color panel walls. Images show the look, not a specific project.

04 · ALSO FROM BARAVEN

Panels, Doors and Furniture on One Order

Fluted and slat panels

Vertical flutes or slats for texture on a feature wall, in the finish you choose.

Natural wood veneer panels

Real wood veneer on plywood, so the wall can match your veneer doors.

Hidden doors in the wall

Flush-to-wall doors finished to match the panel wall around them.

Furniture

Headboards, casegoods and seating in matching finishes, on the same quote.

05 · HOW TO ORDER

From Your Walls to Your Panels

1

Send your walls

Elevations or photos with sizes, and door and window positions.

2

Choose the finish

By code from this guide, per room or per wall. Gloss or matte.

3

We confirm the layout

Your quote lists the boards for each wall, and any trims you ask for.

4

Approve before production

Finishes, sizes and quantities, confirmed in your quote.

5

Shipping and import

Handled by our U.S. team.

6

Delivery

Lead time and terms confirmed in your quote.

Send us your wall drawings. Wall widths and heights, door and window positions, the panel code per room, gloss or matte, quantity or room count, and the project city and state.

info@baraven.com · baraven.com/wall-panels · We reply by email within 1–2 business days.

BARAVEN selection codes are used in this guide. Images show each look, not a specific project. Colors in print and on screen vary from the actual board. Sizes, finishes, quantities and what's included are confirmed in your quote. Wall panels are also available for OEM and private label.
